

SPWVERKO

QUALITY FORGED BY GENERATIONS

COMPANY PRESENTATION

ABOUT US

- ✦ Long tradition – production since 1999.
- ✦ Export history for German and Austrian companies.
- ✦ Experienced and stable employees, trained and certified – DIN EN ISO 3834-3, ISO 9001.

CERTIFICATES

- ★ Welding protocols WPQR EN ISO 15614-1
- ★ Welding certificates EN ISO 9606-1
- ★ Certified weld inspection personnel – visual and penetration test – EN ISO 9712:2013
- ★ Production inspected by a welding engineer

WE SPECIALISE IN

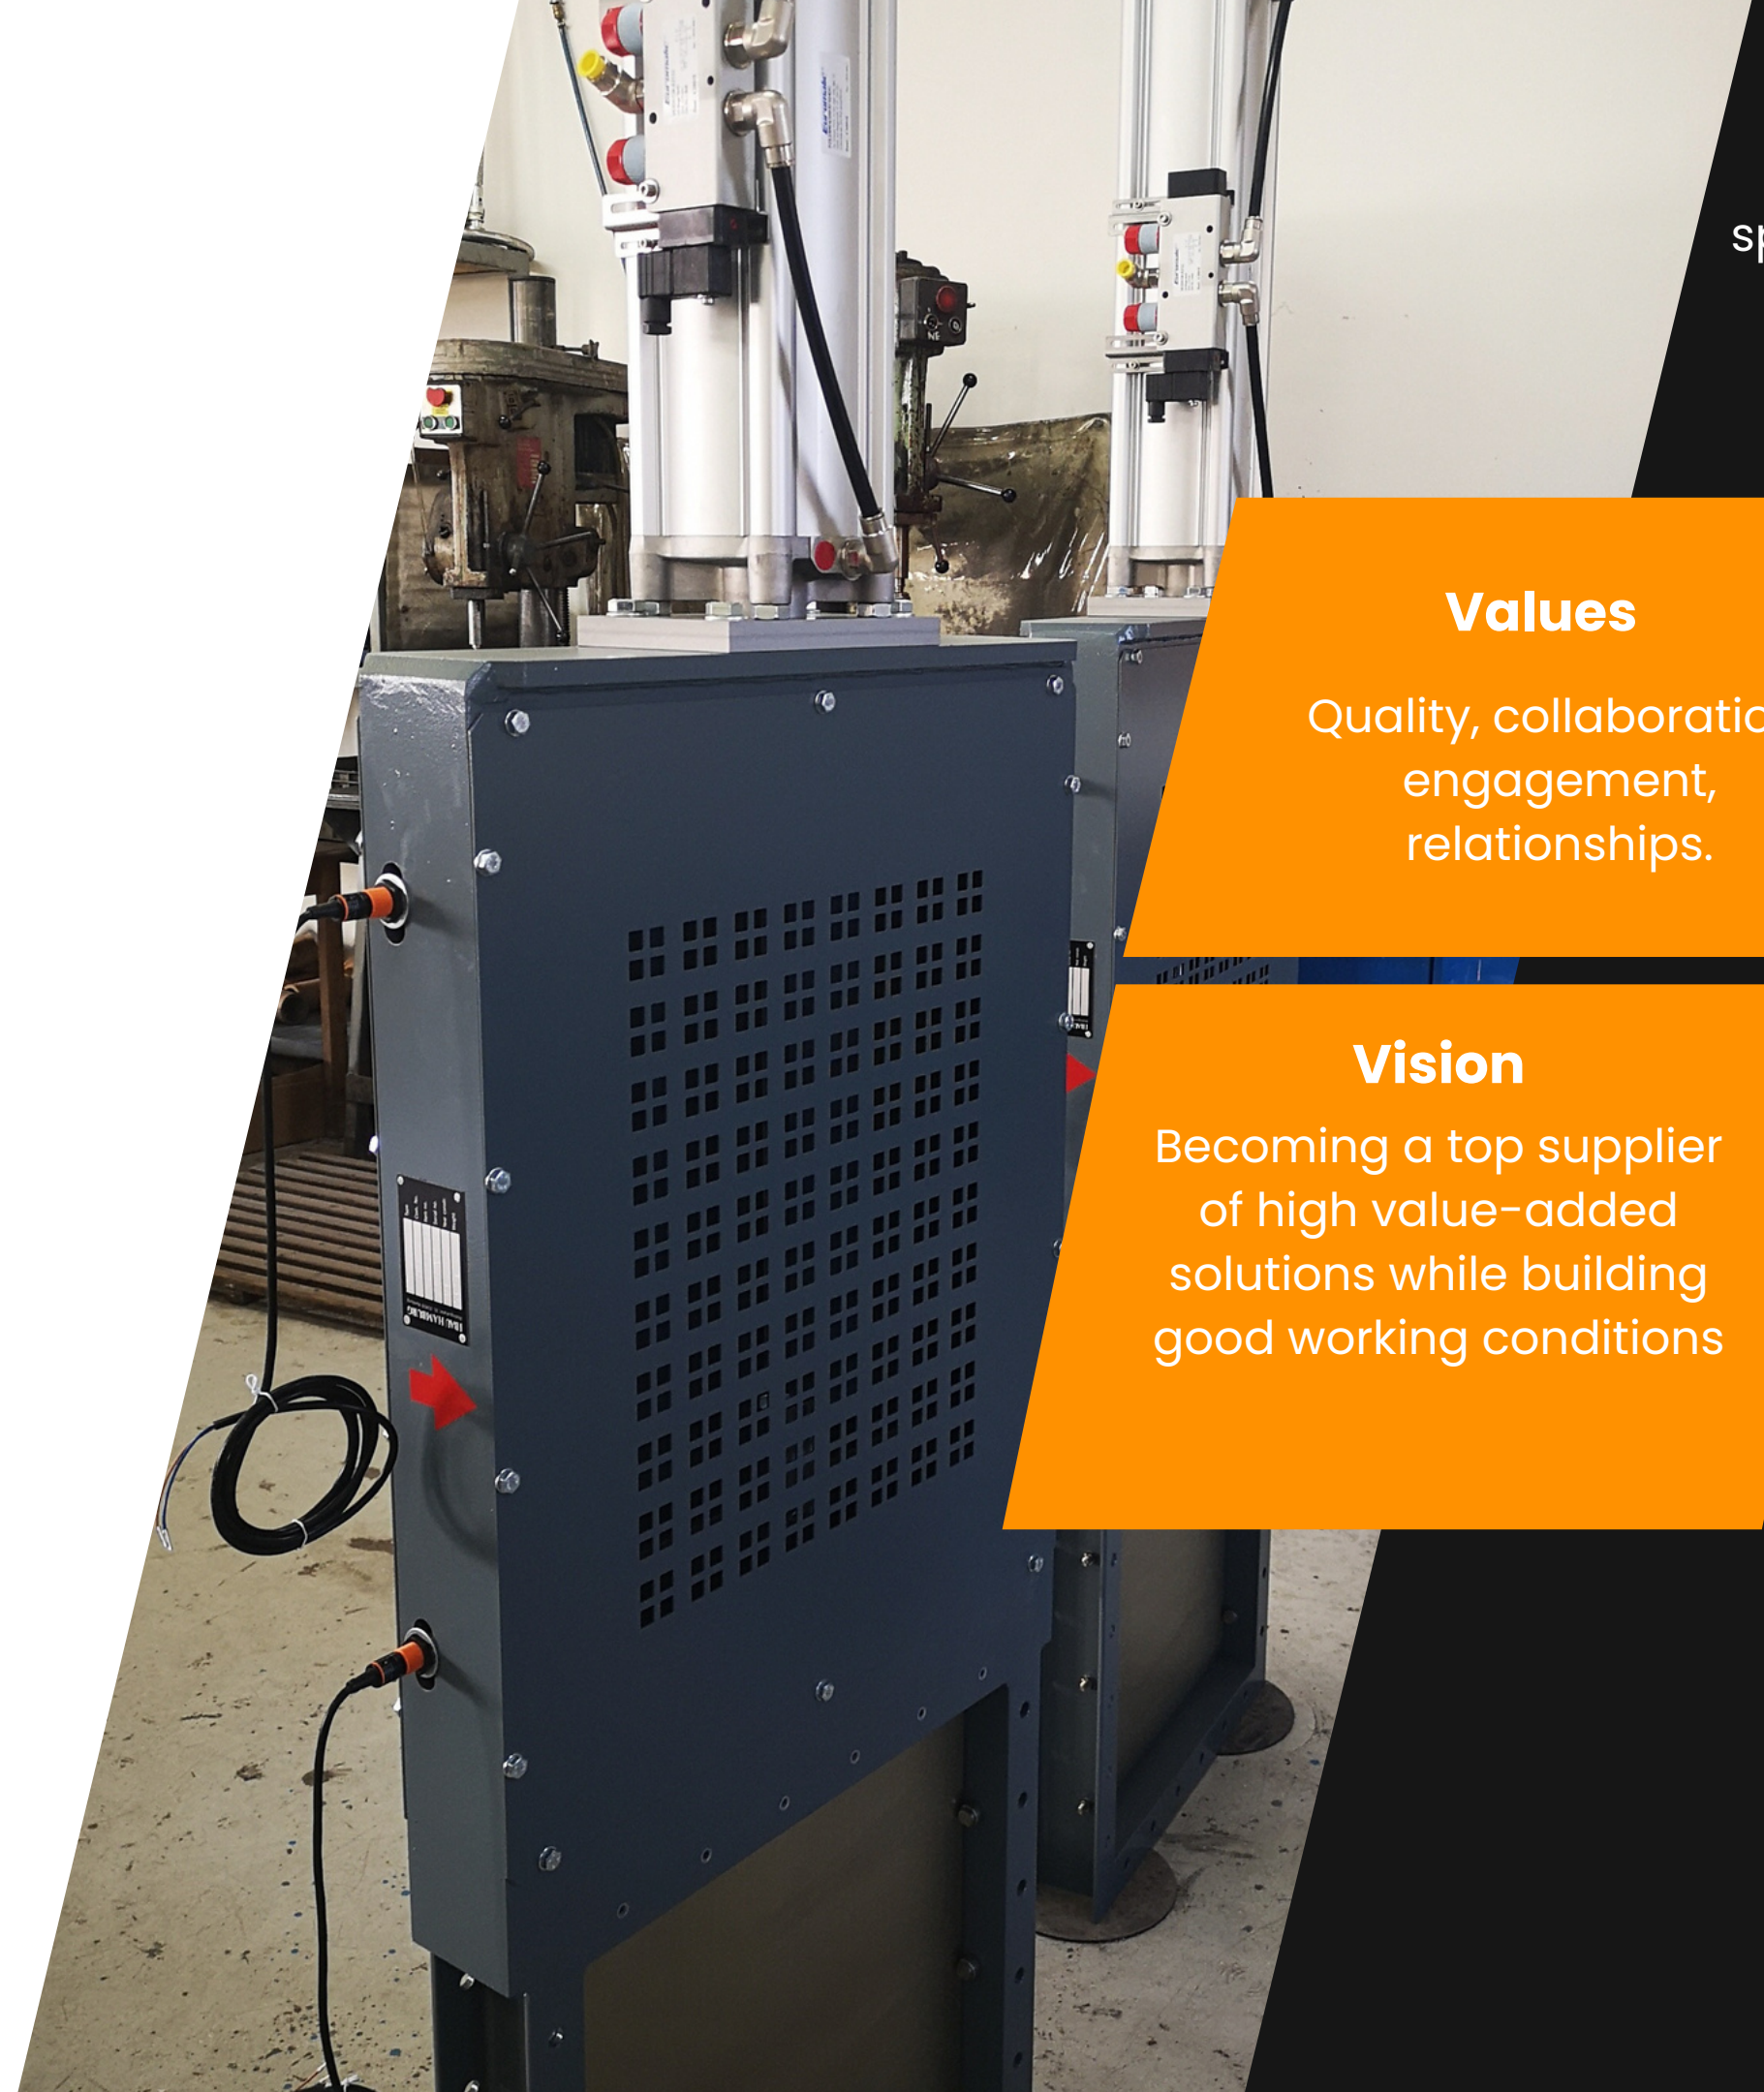

- ★ Pneumatic and handling equipment components and other products for industrial applications
- ★ Steel structures, sheet metal and profile processing in steel and stainless steel
- ★ Custom sheet steel parts, machined components and special welded products

Values

Quality, collaboration,
engagement,
relationships.

Vision

Becoming a top supplier
of high value-added
solutions while building
good working conditions

PRODUCTION CAPACITIES

- ✦ Production area **2352 m²**
- ✦ Max. product weight **2.2 t**
- ✦ Max. product dimensions **6 m** length, **3x3** width x height
- ✦ Max. welding plate thickness up to **40 mm**
- ✦ Max. bending up to **10 mm and 3 m** of sheet metal
- ✦ Max. rolling up to **2 m and 5 mm** (in cooperation up to 12 mm)
- ✦ Processing of **laser cuttings** in co-operation is standard in our company
- ✦ Own **blasting** and **painting** shop

REFERENCES

Design and production:

Pipe closures

Design and production:

Air dampers
Granulate hoppers and
dispensers
Pipe closures
Pipe parts

**Preparation and
production:**

Industrial shock
absorbers

PNEUMATIC VALVE

It is used to equalize the pressure in the bulk material silos.

PIPE CLOSURES

The device is fixed in the transport path by bolted connections. The slide is operated by a crank, a wheel with a handle or a chain wheel

PRODUCTION DEMONSTRATION

PIPE PARTS

The equipment is manufactured in several sizes depending on the amount of granulate and the size of the conveying channels.

INDUSTRIAL SHOCK ABSORBERS

Shell welded from steel plate, absorption core covered with stainless steel perforated plate.

PRODUCTION DEMONSTRATION

MOTORISED PIPE CLOSURES

Robust slide gate valves in various designs and with motor drive

PNEUMATIC PIPE CLOSURES

Version with pneumatic drive

PRODUCTION DEMONSTRATION
